

Why Choose PRC

Companies choose PRC for several reasons:

Our Expertise PRC's experience and unmatched recovery rates prove our reputation as a leading durable-goods remanufacturer.

Our Quality Our system filters out all parts unfit for final assembly and tests each finished unit to verify conformance to a pre-established standard.

Create a New Revenue Stream The additional revenue drawn through sales of remanufactured goods will greatly reduce the expense associated with returns.

Your Facilities By eliminating the need to store returned merchandise, you'll maintain cleaner, more manageable facilities.

Our Facilities PRC takes pride in having the cleanest, most organized remanufacturing plant you'll ever see. We've recently invested over \$5 million into our newest facility. Let us put that investment to work for you.

Avoid DIF Companies using dispose-in-field programs know that they are costly and run the risk of potentially damaging the integrity of their brand.

Reduce Overhead Reduce or eliminate inefficient overhead; liberate valuable human resources and use them to focus on your primary business functions.

The Ultimate Form of Recycling Recycling recovers the only raw materials of a good, whereas remanufacturing recovers much of the raw materials, labor, energy and overhead originally used by the OEM to create the good. **Profit From Returns.**
